Recently, Tom Schorpen from Sleipner Motor A/S, the Lectrotab Distributor in Norway, inquired as to whether or not the Lectrotab actuators had been assigned an “IP Rating”. We were not familiar with this rating, so Tom sent us the following internet link so we could educate ourselves: [http://www.rlws.com/lit/load-cells/IP\\_ratings.html](http://www.rlws.com/lit/load-cells/IP_ratings.html).

Eddie Miller, head of our Engineering Department, promptly reviewed the “Ingress Protection Ratings” (IP Ratings) and certified our linear actuators to have an IP66/68 rating. This is a water jet and immersion rating which we certify based on proper installation and approved application of our linear actuators. (for example: trim tab installations)

As always, we appreciate all comments from the field, and we will continue to diligently respond to all.

More next week but let us hear from you in the meantime. Use [mailcall@lectrotab.com](mailto:mailcall@lectrotab.com) for your reply. Our responses will be very quick.

Best Regards,

Lectrotab Sales
